## Retinol-A Rejuvenator Wrinkle Cream

We believe this is the only non-prescription face cream which genuinely diminishes fine lines and wrinkles.

A cream with the highest potency of Retinol-A available. It compares and exceeds the effectiveness of creams selling for as much as £68 an oz.

For a fraction of this price you'll buy not only an exfoliate but a pharmaceutical-quality natural vitamin A and E cream. We believe this will become one of our most popular new lines.

More effective than ROC or Diminish at a fraction of the cost! ROC sells for £32 (MSRP) for 1 oz. Estee Lauder's Diminish sells for £56 (MSRP) for less than 1 oz. Our Retinol-A Cream has more retinol plus Vitamin E and it is only for £14.45 for 2 ozs.

### How Retinol-A Rejuvenator Wrinkle Cream Works

Richly textured and quickly absorbed, this elegant night cream works continuously while you sleep, so you wake to firmer, smoother healthier-looking skin.

Rather than simply exfoliating the skin's surface layer, Young again 's Retinol Anti-Wrinkle Treatment releases pure and active vitamin A below the skin's surface, reducing the signs of Ageing. As a result, skin renews itself, and fine lines and wrinkles are visibly reduced.

Retinol-A Wrinkle Cream is the only non-prescription face cream proven to diminish fine lines and wrinkles. Applied regularly to the skin it will create a smoother and rosier glow. It is designed to be applied to the hands as well as the face and can be used by both men and women to erase lines, reduce and eliminate wrinkles, and to fade age spots. Retinol-A contains 600,000 IU Retinyl Palmitate per 2-ounce jar. The strongest cream available.

This is not a dangerous Exfoliate. Just Pure Pharmaceutical quality Vitamin A and E. Retinol-A Wrinkle Cream does not simply exfoliate the surface layer of the skin like other over-the-counter wrinkle treatments. It contains Retinyl, a vitamin A derivative naturally occurring in the body. During the first month of use the skin becomes both smoother and softer. After two to three months, brown spots fade and the fine lines around the mouth and eyes begin to diminish and disappear.

Our carefully formulated Retinol-A Cream does not have the side effects of the prescription Retin-A. Young Again Retinol-A has accomplished this by solely using pure and active retinol (vitamin A). The cream also contains 5000mg of soothing vitamin E. This cream is hypoallergenic, non-comedogenic and non-phototoxic. Moreover, unlike creams selling for £56 or more an ounce, we guarantee that it will diminish wrinkle lines when used consistently over a 30-day period. Most users, men and women, see immediate results.

People often ask why this product can sell for 10% of the price charged by Estee Lauder for a comparable retinol cream. The answer is that this retinol has been tested against theirs and wins by a large margin, we just lack the marketing savvy of Estee Lauder, and that's to our client's advantage.
